

Name of the Event : **Valentine's Day**
 Date : 14 February 2023
 Classes Involved : I-V
 Conducted By : Primary Wing Teachers

“A purpose of human life, no matter who is controlling it, is to love whoever is around to be loved.” – Kurt Vonnegut

Valentine's Day, also called as Saint Valentine's Day or the Feast of Saint Valentine, is celebrated annually on February 14th to celebrate the bond of love and affection. To teach the students about the expression of love, a Card Making Activity was conducted for the students on 14th February 2023. The students prepared cards in heart shape as all the feelings emerge from the heart. The red colour symbolises love, so this was the colour used by the students for decorating cards along with it a special assembly was organised to commemorate the day which was lined up with song and special dance performance of the kids.

ITL was contented with joy, happiness and love all around.
