The Occasion was graced by the Hon'ble Prime Minister of India. The traders from different parts of India showcased the possible sustainable super foods along with their nutritional benefits. In the exhibition several varieties of food stuff made from millets were put on display. The session enlightened them on the enormous potential millets hold; be in it their nutritional values or the drought resistance capacity. The students were completely awestruck upon viewing such a large number of dishes; made solely out of millets. The visit encouraged them to inculcate these superfoods in daily use and also to join the country in its milletization league!!!
