

ITL PUBLIC SCHOOL  
CLASS XII FASHION STUDIES

Summer Engagement Program

1. Swatch library on different types of trims: explore different types of trims that are commonly used in fashion, such as lace, ruffles, ribbons, buttons, zippers, and appliques. Create a visual reference guide or a swatch library with samples of each type of trims (including pictures, samples, and descriptions.). Also design a garment that features at least two different types of trims.
2. Create an eye-catching fashion file cover that showcases your design sensibility and creativity. Use bright and attractive colors, include a clear and creative title for your project and ensure that the text on the cover is legible and easy to read.
