

**TITLE: THE PANTHER**

**AUTHOR: NELSON DEMILLE**

The book provides an action based and a thriller adventure of TWO American officials who were sent to a country with multiple inter-country conflicts, as well as with the international states. The author took us through a well thought and executed story, with the climax and the aftermath being the top-notch work in this novel. All the way in the story, there wasn't a plot or an instance which felt artificial or non-appealing to read and think about.

The inclusion of 'Chapters' helped to maintain an even flow of the exciting parts of the story, keeping the reader at the edge of their seat and encouraging them to read more. I personally would like to have a sequel to this book by Nelson Demille.
