

World Environment Day

NAME OF THE EVENT: World Environment Day

DATE: June 5, 2023

CONDUCTED BY: SCIENCE DEPARTMENT

"The environment is not just a backdrop to our lives; it is the very essence of our existence. Let us cherish and protect it, for in doing so, we safeguard the future of our planet and the well-being of all living beings."

The World Environment Day campaign #BeatPlasticPollution calls for global solutions to combat plastic pollution. It is the time to accelerate actions against single use plastics, limit waste and push for a transition to a circular economy. As every small action counts, ITLeens celebrated the beauty and diversity of our planet by spreading awareness and taking a pledge to reduce their carbon footprints and embracing sustainable practices. With this commitment, Together, we can create a greener, cleaner, and more sustainable future for generations to come. May our actions today lead to a greener and more sustainable future.
