

# ITL CANDYFLOSS

## NATIONAL TEACHER'S EXCHANGE PROGRAMME

**“There is no enjoying the possession of anything valuable unless one has someone to share it with.”  
-Seneca**

With the vision of coming together and learning from each other, the Principal of ITL Public School, Dr. Sudha Acharya took the initiative to organize the \*National Teacher Exchange Programme '\* on 31 July'23. The purpose of the exchange program was to share the experiential learning under Holistic Progress Card. A few mentors from DRV DAV Centenary Public School, Phillaur and DAV International School, Amritsar participated in the exchange programme. The host school played a catalyst to the noble cause of Janbhagidari turning the philosophy of Vasudeva Kutumbakam into a reality. A plethora of activities that are practiced in the school were showcased and demonstrated. The innovative practices and creativity involved in learning were shared by the teachers in Candyfloss for Pre school and Pre Primary. It truly summed up the essence of the new education policy. The little ones enjoyed their rhymes and playground time grasping the basic concepts through the play way method. The tour to the Sanjeevani Vatika in the school premises helped the fellow teachers to understand the conception of Anthelia - a Startup Initiative by the ITLeens, where they use the natural organic herbs grown in the school compound to make numerous herbal products.

The visit to the classroom brimming with children brought forward the beautiful amalgam of Toy pedagogy and hands on learning as mentioned in NCF to make teaching learning interesting and engaging. Effective communication and development of language skills were aptly showcased in the Language lab class. A peep into the interactive classrooms exhibited how the facilitators encourage students to participate in fun, creative and exploratory activities for experiential learning as per NEP norms.

The teachers came together to collaborate, learn together, grow together & empower each other by sharing & exchanging human and educational resources and diverse innovative practices .

The exchange programme served an effective platform to share the pedagogical practices and methodologies. It also helped to know each other's culture, traditions and value system.
