

Robo Race Competition at APS Dhaula Kuan: A Thrilling Display of Robotics and Innovation

The Robo Race Competition held at Army Public School (APS) Dhaula Kuan was a captivating display of technological prowess and innovation. The event aimed to provide students with a platform to showcase their engineering skills, programming expertise, and teamwork. The competition challenged participants to design and build robots capable of racing on a track filled with twists and turns, all within a specified time frame. . Participants were given guidelines regarding the size, weight, and power source of the robots

Team of students from TAFS comprised of **Akshat Krisha and Vivaan Mishra of VIII A** bagged Second position in this competition

Participants worked together to troubleshoot issues, fine-tune their robots, and develop effective strategies for the race.

Congratulations to the Team for their achievement.
