

## *Astronomy Fair 2023*

World space week was celebrated in the school on 7th October, 2023.

An Astronomy Fair was organized by the members of Astronomy club for the primary school, in which various interesting activities and recreational games were performed to develop an understanding of the basic concepts of space and astronomy. They learned about the Newton's Third law of motion by balloon rocket race and the existence of the black hole by understanding the "life cycle of a massive star". They were able to experience 3D objects using 3 D glasses. The functioning of Chandrayaan 3 was explained well through the working model. Various phases of the moon were shown in an interesting manner. They learned about the solar system by playing the game "Arrange the Planets."

An Interhouse Poster making competition on the theme "Space and Entrepreneurship" was organized for the Senior school students.

The astronomy fair not just gave a joyful experience to the students but also made them aware of importance of astronomy and space science.
