

REPORT

Theme- Welcome Assembly and activities

Date- 3 April, 23 to 6 April, 23

Conducted by- Class I & II

School is a place where all learn, care, enjoy and achieve success together.

To mark the beginning of the session 2023-24, a Special Assembly was hosted by the teachers to extend a hearty welcome to the young ITLeens. The students were taken on a campus tour to make them familiarise with their new surroundings. To make the first week special and memorable a plethora of activities were conducted. To promote awareness about millets and their health benefits students made **Millet seed bombs** as an easy and sustainable way to cultivate plants. They expressed their feelings of first day at school by using different emojis. Unique and colourful clay sea creatures were made and placed by them in their class aquarium. They also exhibited their culinary skills by making delicious Ragi Ladoos. To make the day more fascinating our little learners were accompanied by their parents who apprised them about the Nutritional benefits of Millets. Indeed, it was a fun filled **bagless week** with a plethora of creative activities.
