CIRCULAR

Dear Parents,

Greetings!

The recent increase in the no. of cases of dengue fever is a cause of concern for all of us. It is a mosquito-borne disease so it is imperative that we all follow precautions to prevent the rapid spread of the same.

Please keep in mind the following points to help curb the spread of dengue:-

- The symptoms include high fever followed by nausea, vomiting, headache and rashes on the body. Please avoid sending your ward to school in case any of these symptoms are present and until the symptoms are resolved.
- You may also send your ward in full-sleeves shirt and full pants.
- We are ensuring that there are no mosquito-breeding grounds within the campus.
- All other necessary steps like fogging of the school premises are being taken to protect our children.
