### **A Glimpse of the Event**

**Objectives:** To enable the learners to

- Introduce students to the field of architecture and design.
- Provide insights into the various career opportunities in architecture and design.
- Guide students on the importance of a strong portfolio for admission to architecture and design programs.

*All real education is the architecture of the soul. -William Bennett*

On 15 December 2023, MBS International School, Dwarka organized a comprehensive Workshop on Architecture and Designing for the students of Workshop for Class X, XI(SCI) and XII (SCI) by **MBS School of Planning and Architecture, New Delhi**. The workshop outlined the educational journey required to pursue a Bachelor of Architecture or Design and also provided information on the admission process, prerequisites, and academic requirements. Architecture and design play a crucial role in our daily lives, influencing our experiences and surroundings. For grade X, XI and XII students, understanding these disciplines can be beneficial in several ways. Firstly, it fosters creativity and critical thinking, encouraging students to approach problem-solving in innovative ways. Studying architecture and design also promotes an appreciation for aesthetics and the impact of the built environment on individuals and communities. It helps students understand the historical and cultural aspects of architecture, providing insights into how societies have evolved through their structures.

Moreover, architecture and design education equips students with practical skills, such as spatial planning, project management, and collaboration, which are valuable in various professions. In a rapidly changing world, these skills can enhance adaptability and prepare students for future challenges.

Overall, the workshop should serve as a comprehensive introduction to the field, inspire students to consider architecture and design as a viable career path, and provide them with the necessary information to make informed decisions about their educational and professional futures.
